

Costa Mesa wants to hear from you - *Your Feedback Counts!*

SRTS Plan

The Safe Routes to School (SRTS) Plan will develop recommended infrastructure improvements around each campus intended to increase **safe and convenient opportunities for children to walk and bicycle to and from school.**

We know that walking to and from school offers many benefits, including for a student's health and learning environment.

Project Tasks

Existing Conditions

The team will visit each school site and talk with school administration and stakeholders to review conditions around each campus.

Safety Assessment

Review of crash history and other data with a focus on pick up and drop off times.

Classroom Surveys

In-class, anonymous raise-of-hand surveys conducted to help understand how students travel to and from school.

Why This is Important

All of this data will help the City of Costa Mesa to be better prepared to obtain possible future funding and grants, with a shared goal of making children's journeys to and from school an all-around better experience!
